# OSHA Compliance Information

Hazard Communication Standard (29 CFR 1910.1200)

This GHS Safety Binder is maintained in accordance with the OSHA Hazard Communication Standard, which requires employers to provide workers with effective information and training on hazardous chemicals in their work area.

## Key Requirements:

- Safety Data Sheets (SDS) must be readily accessible to employees
- Chemical inventory must be maintained and updated
- Employee training on chemical hazards is required
- Container labeling must follow GHS standards

## Emergency Access:

This safety information is available 24/7 without restrictions for emergency response and compliance purposes. No login or password is required for emergency personnel to access critical safety information.

## Document Currency:

All Safety Data Sheets should be reviewed regularly and updated when newer versions become available from chemical suppliers. Employers are responsible for maintaining current safety information.

**Last Updated: 2025-07-25**

# Legal Disclaimers

## **Customer Responsibility:**

SQZR Demo Account is solely responsible for ensuring the accuracy, completeness, and currency of all chemical safety information displayed in this binder and on the associated website.

## **System Provider Disclaimer:**

RascoWeb, Inc. assumes no responsibility for the accuracy, completeness, or currency of the chemical safety information provided. The customer is solely responsible for maintaining accurate and up-to-date safety documentation.

## **OSHA Compliance:**

It is the customer's responsibility to ensure compliance with all applicable OSHA regulations, including the Hazard Communication Standard (29 CFR 1910.1200). This system is provided as a tool to assist with compliance but does not guarantee regulatory compliance.

## **Emergency Use:**

While this system provides 24/7 access to safety information for emergency purposes, users should always contact emergency services (911) and chemical suppliers directly for immediate emergency response.

## **Document Currency:**

Safety Data Sheets and product literature should be updated regularly. Users should verify with chemical suppliers that they have the most current versions of all safety documentation.
